THE NEXT FRONTIER OF INNOVATION: BEAUTYTECH START-UPS

Research and Development is one of the driving forces of today's cosmetic industry: it is thanks in part to the study of new technologies, new ingredients, and interaction

between brand and customer that leading international companies have been able to establish themselves in the sector.

On the threshold of a new decade, the new frontier of innovation is beauty tech: beauty becomes digital, and Artificial Intelligence, Virtual Reality and Augmented Reality become key elements for taking care of one's self.

The area will be located within the Garden of Innovation, managed by the trend agency Beautystreams, and will be dedicated to the megatrends that will influence our society in the future and to the innovations that will characterize the beauty sector in the next 10 years.

Thanks to the support of the Italian Ministry of Economic Development and ITA - Italian Trade Agency, the start-ups will participate in Cosmoprof Next: a pitch competition that will promote the best projects by venture capitalists, investors, buyers and institutions.

The initiative is organized in collaboration with Cariplo Factory, FaB - Fashion and Beautytech, FoundersFactory, Living in Digital Times, and Unicredit Start Lab.
